<sup>1</sup> 7-day net yield, also known as the current annualized yield, represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a seven-day base period expressed as a percentage of the value of one share at the beginning of the seven-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 7.

<sup>2</sup> The monthly distribution yield represents the net change in the value of a hypothetical account with a value of one share (normally \$1.00 per share) resulting from all dividends declared during a month by the Pool expressed as a percentage of the value of one share at the beginning of the month. This resulting net change is then annualized by multiplying it by 365 and dividing it by the number of calendar days in the month.

<sup>3</sup> Weighted Average Maturity: Calculated by the final maturity for a security held in the portfolio and the interest rate reset date. This is a way to measure a fund's sensitivity to potential interest rate changes.

<sup>4</sup> S&P Global AAAM Rating: S&P evaluates a number of factors, including credit quality, market price, exposure, and management. Please visit [SPGlobal.com/Ratings](https://www.spglobal.com/Ratings) for more information and ratings methodology.

<sup>5</sup> Fitch AAAM Rating: portfolios with this rating indicate having the highest underlying credit quality. Please visit [fitchratings.com](https://www.fitchratings.com) for more information and ratings methodology.

<sup>6</sup> Fitch AAAMmf Rating: portfolios with this rating denote the strongest capacity to achieve the investment objective of preserving principal and providing liquidity through limiting credit, market, and liquidity risk. Please visit [fitchratings.com](https://www.fitchratings.com) for more information and ratings methodology.

<sup>7</sup> As of the last day of the month. The 30-day net yield represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a thirty-day base period expressed as a percentage of the value of one share at the beginning of the thirty-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 30.

<sup>1</sup> The S&P LGIP Prime Taxable Index comprises 54 'AAAm' and 'AAm' Rated Government Investment Pools. The S&P LGIP Prime Taxable Index is reported as a seven-day yield on a weekly basis net of fees. The S&P LGIP Prime Taxable Index is not a security in which investors can purchase shares.

Past performance does not guarantee future results. Yields will fluctuate as market conditions change. The current fund performance may be higher or lower than that cited. The yields shown may reflect fee waivers by service providers that subsidize and reduce the total operating expenses of the Pool. Pool yields would be lower if there were no such waivers.
