Disclosures

The current seven-day yield, also referred to as the current annualized yield, represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a seven-day base period expressed as a percentage of the value of one share at the beginning of the seven-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 7. Past performance is not indicative of future results and yields may vary. The yields shown above may reflect fee waivers by the Pool's current or prior service providers. When such waivers occur, they reduce the total operating expenses of the Pool, and the Pool's yield would have been lower if there were no such waivers.

The monthly distribution yield represents the net change in the value of one share (normally \$1.00 per share) resulting from all dividends declared during a month by the CSIP Liquid Portfolio expressed as a percentage of the value of one share at the beginning of the month. This resulting net change is then annualized by multiplying it by 365 and dividing it by the number of calendar days in the month.

For the CSIP Liquid Portfolio, the expense ratio represents the total expenses for the last month of the reporting period divided by the average daily net assets for the month. The expense ratio shown may reflect fee waivers by the Pool's service providers. When such waivers occur, they reduce the total operating expenses of the Pool, and the Pool's yield would have been lower if there were no such waivers. For the CSIP Term Portfolio, the expense ratio reflects the operating expenses incurred during quarter divided by the average quarterly net position in each term series. The resulting calculation is then annualized.
